

DIES MONTH AFTER HE GOT 16,000-VOLT SHOCK

Three Operations Failed to Save Hartford Man's Life.

(By Telegraph to The Tribune.)
Hartford, Conn., Aug. 14.—After surviving three operations to relieve the effects of a shock of 16,000 volts of electricity, received last month, Francis P. Bill, eldest son of Major Fred R. Bill, of this city, is dead.

With three other students of the Massachusetts Institute of Technology, Bill, 21, July 14, was working at the power plant of the Bristol Tramway Company, when his shirt, wet with perspiration, came in contact with a transmission cable running across the roof of the power station.

Bill, who was planning to attend the Plattsburgh encampment, was a former football player and a member of the Delta Upsilon fraternity.

THE WEATHER REPORT

Official Record and Forecasts for the Next Twenty-four Hours.

Washington, Aug. 14.—The tropical disturbance is moving westward south of Santo Domingo. As yet no definite information as to its position is at hand. Pressure over the Western Atlantic Ocean has fallen slightly in the last twenty-four hours, the centre of greatest fall being over the Grand Banks. Pressure over the northern tier from the lake region to the Dakotas is falling with the eastward movement of a low.

Local rains have fallen in Kansas, Missouri, Iowa and the upper Missouri Valley.

The temperature is below the seasonal average in Northeastern districts and those westward to the lower Mississippi Valley. It is still relatively warm in the Gulf states and the Rocky Mountain and western regions. Showers are probably to occur in the upper lake region, the local pressure falling slightly. The pressure will definitely extend Wednesday into the middle Atlantic states. Showers and thunderstorms are also probable in the New England region on Wednesday. The temperature will rise slowly from the lake region eastward to the Dakotas as the change elsewhere will be more or less incomplete.

Winds for Tuesday and Wednesday.—North Atlantic, moderate winds, with fair weather; mid-Atlantic, light north, with fair weather; south and east coast, Gulf, moderate and variable, with fair weather; west Gulf, moderate to fresh south, east, with fair weather; upper lakes, moderate southeast, with fair weather; lower lakes, moderate west, with fair weather.

Forecasts for Special Localities.—Eastern New York, partly cloudy to-day and to-morrow; probably rain and slightly warmer to-morrow.

Western New York and Western Pennsylvania, fair and somewhat warmer to-day; showers to-morrow.

Northern New England, fair to-day and probably tomorrow; somewhat warmer to-morrow.

Southern New England and District of Columbia, fair to-day; increasing cloudiness and slightly warmer to-morrow.

New Jersey, Eastern Pennsylvania and Delaware, fair today with moderate temperature; partly cloudy, with occasional showers; not much change in temperature.

Steeples, partly cloudy to-day and to-morrow.

Virginia, fair to-day; increasing cloudiness to-morrow, probably shower to-day and to-morrow, except showers to occur in western portion.

South Carolina and Georgia, probably showers to occur to-day and to-morrow.

Florida, generally fair to-day and to-morrow.

Alabama and Mississippi, fair to-day; showers to occur to-day and to-morrow.

Tennessee, Kentucky, Ohio and upper Michigan, fair to-day; increasing cloudiness to-morrow.

West Virginia, partly cloudy and warmer to-day, with showers in western portion; showers to-morrow.

Louisiana, partly cloudy to-day and to-morrow; probably showers in southern portion.

Oklahoma and Eastern Texas, partly cloudy to-day and to-morrow.

Local Official Record.—The following official record from the Weather Bureau shows the changes in the temperature for the last twenty-four hours, in comparison with the corresponding date of 1915.

1915. 1916.
8 a. m. 59 6 p. m. 53 76
8 a. m. 79 6 p. m. 77 71
12 m. 79 12 p. m. 75 77
4 p. m. 79 7 p. m. 77 77
Highest temperature yesterday, 77 degrees (at 5:45 p. m.). Average, 69 degrees for corresponding date last year, 77 degrees for corresponding date last thirty-three years, 72.

Barometer Readings.

8 a. m. 29.95 1 p. m. 29.98 8 p. m. 29.84
